

1 Scenarios

1. Least Privilege.
2. Safe Defaults, Security by Design, Open Design.
3. Violates remnant removal as the "keys" are widely available to the public.
4. Violates open design as security should ideally not be enforced through obscurity. Know your adversary.
5. Simplicity and necessity. It is assumed that the height of the second floor windows provides enough security and obviates the need for bars.
6. Defence in depth, both cryptographical and physical security measures have been put in place.
7. Security by design. Simplicity and necessity.
8. Evidence production. Remnant removal.
9. Security by design. Time tested tool.
10. Simplicity and necessity. Least surprise. Reluctant allocation.
11. Least surprise.
12. Evidence production.
